

Characterised control valve, 3-way, Internal thread

- For closed water systems
- For modulating control of air-handling and heating systems on the water side
- Air-bubble tight (control path A – AB)

Picture may differ from product

Type overview

Type	DN	Rp ["]	Kvs [m³/h]	PN	n(gl)	Sv min.
R3015-P25-S1	15	1/2	0.25	40	3.2	50
R3015-P4-S1	15	1/2	0.4	40	3.2	50
R3015-P63-S1	15	1/2	0.63	40	3.2	50
R3015-1-S1	15	1/2	1	40	3.2	50
R3015-1P6-S1	15	1/2	1.6	40	3.2	50
R3015-2P5-S1	15	1/2	2.5	40	3.2	50
R3015-4-S1	15	1/2	4	40	3.2	100
R3020-4-S2	20	3/4	4	40	3.2	100
R3020-6P3-S2	20	3/4	6.3	40	3.2	100
R3025-6P3-S2	25	1	6.3	40	3.2	100
R3025-10-S2	25	1	10	40	3.2	100
R3032-16-S3	32	1 1/4	16	25	3.2	100
R3040-16-S3	40	1 1/2	16	25	3.2	100
R3040-25-S4	40	1 1/2	25	25	3.2	100
R3050-25-S4	50	2	25	25	3.2	100
R3050-40-S4	50	2	40	25	3.2	100
R3050-58-S4	50	2	58	25	3.2	100

Technical data

Functional data	Fluid	Water, water with glycol up to max. 50% vol.
	Fluid temperature	-10...120°C [14...248°F]
	Fluid temperature note	At a fluid temperature of -10...2°C, a spindle heater or a valve neck extension is recommended. The allowed fluid temperature can be limited, depending on the type of actuator. Limitations can be found in the respective data sheets of the actuators.
	Close-off pressure Δp_s	1400 kPa psi
	Differential pressure Δp_{max}	350 kPa
	Differential pressure note	200 kPa for low-noise operation
	Flow	Bypass B – AB: 70% of Kvs value
	Flow characteristic	Control path A – AB: equal percentage (VDI/VDE 2173), optimised in the opening range, Bypass B – AB: linear (VDI/VDE 2173)

Technical data

Functional data	Leakage rate	Control path A – AB: air-bubble tight, leakage rate A (EN 12266-1); Bypass B – AB: Leakage class I (EN 1349 and EN 60534-4) 1...2% of the Kvs value with respect to the largest value within the DN
	Angle of rotation	90°
	Angle of rotation note	Operating range control path A – AB 15...90°, Bypass B – AB 15...70°
	Pipe connection	Internal thread according to ISO 7-1
	Installation orientation	upright to horizontal (in relation to the spindle)
	Servicing	maintenance-free
Materials	Valve body	nickel-plated brass body
	Body finish	nickel-plated
	Closing element	Stainless steel
	Spindle	Stainless steel
	Spindle seal	EPDM O-ring
	Seat	PTFE, O-ring EPDM
	Characterised disc	ETFE (DN 15, 20, 25, 32, 40, 50) Stainless steel (DN 40, 50)

Safety notes

- The valve has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- The valve may not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be observed.

Product features

Operating mode	The characterised control valve is adjusted by a rotary actuator. The actuator is controlled by a commercially available modulating or 3-point control system and moves the ball of the valve – the throttling device – to the position dictated by the control signal. Open the characterised control valve counterclockwise and close it clockwise.
Flow characteristic	Equal percentage flow control is ensured by the integrated characterising disc.

Accessories

Electrical accessories	Description	Type
	Stem heater for ball valve DN 15...50, AC/DC 24 V, 20 W	ZR24-2
Mechanical accessories	Description	Type
	Valve neck extension for ball valve DN 15...50	ZR-EXT-01
	Pipe connector for ball valve with internal thread DN 15 Rp 1/2"	ZR2315
	Pipe connector for ball valve with internal thread DN 20 Rp 3/4"	ZR2320
	Pipe connector for ball valve with internal thread DN 25 Rp 1"	ZR2325
	Pipe connector for ball valve with internal thread DN 32 Rp 1 1/4"	ZR2332
	Pipe connector for ball valve with internal thread DN 40 Rp 1 1/2"	ZR2340

Accessories

Description	Type
Pipe connector for ball valve with internal thread DN 50 Rp 2"	ZR2350

Installation notes

Permissible installation orientation The ball valve can be installed upright to horizontal. The ball valve may not be installed in a hanging position, i.e. with the spindle pointing downwards.

Water quality requirements The water quality requirements specified in VDI 2035 must be adhered to. Belimo valves are regulating devices. For the valves to function correctly in the long term, they must be kept free from particle debris (e.g. welding beads during installation work). The installation of a suitable strainer is recommended.

Servicing Ball valves and rotary actuators are maintenance-free. Before any service work on the control element is carried out, it is essential to isolate the rotary actuator from the power supply (by unplugging the electrical cable if necessary). Any pumps in the part of the piping system concerned must also be switched off and the appropriate slide valves closed (allow all components to cool down first if necessary and always reduce the system pressure to ambient pressure level). The system must not be returned to service until the ball valve and the rotary actuator have been correctly reassembled in accordance with the instructions and the pipeline has been refilled by professionally trained personnel.

Flow direction The direction of flow, specified by an arrow on the housing, is to be complied with, since otherwise the ball valve could become damaged. Please ensure that the ball is in the correct position (marking on the spindle).

Dimensions
Dimensional drawings

L1: Maximum screwing depth.

X/Y: Minimum distance with respect to the valve centre.

The actuator dimensions can be found on the respective actuator data sheet.
