SITOP PSU100C/1ACDC/24VDC/1.3A

SITOP PSU100C 24 V/1.3 A stabilized power supply input: 120-230 V AC (110-300 V DC) output: 24 V DC/1.3 A \*Ex approval no longer available\*

Input	
type of the power supply network	1-phase AC or DC
supply voltage at AC	
<ul> <li>minimum rated value</li> </ul>	100 V
<ul> <li>maximum rated value</li> </ul>	230 V
<ul> <li>initial value</li> </ul>	85 V
• full-scale value	264 V
input voltage	
● at DC	110 300 V
design of input wide range input	Yes
overvoltage overload capability	2.3 × Vin rated, 1.3 ms
operating condition of the mains buffering	at Vin = 230 V
buffering time for rated value of the output current in the event of power failure minimum	20 ms
operating condition of the mains buffering	at Vin = 230 V
line frequency	
• 1 rated value	50 Hz
• 2 rated value	60 Hz
line frequency	47 63 Hz
input current	
<ul> <li>at rated input voltage 100 V</li> </ul>	0.63 A
<ul> <li>at rated input voltage 230 V</li> </ul>	0.31 A
current limitation of inrush current at 25 °C maximum	34 A
I2t value maximum	1.2 A <sup>2</sup> ·s
fuse protection type	internal
• in the feeder	Recommended miniature circuit breaker: from 16 A characteristic B or from 10 A characteristic C
Output	
voltage curve at output	Controlled, isolated DC voltage
output voltage at DC rated value	24 V
output voltage	
• at output 1 at DC rated value	24 V
relative overall tolerance of the voltage	3 %
relative control precision of the output voltage	
<ul> <li>on slow fluctuation of input voltage</li> </ul>	0.1 %
<ul> <li>on slow fluctuation of ohm loading</li> </ul>	0.2 %
residual ripple	
• maximum	200 mV
• typical	25 mV
voltage peak	
• maximum	300 mV

• typical	20 mV
adjustable output voltage	22.1
	Yes
product function output voltage adjustable	
type of output voltage setting	via potentiometer
display version for normal operation	Green LED for output voltage OK
behavior of the output voltage when switching on	Overshoot of Vout approx. 5 %
response delay maximum	0.6 s
voltage increase time of the output voltage	
• typical	90 ms
output current	
rated value	1.3 A
rated range	0 1.3 A; +60 +70 °C: Derating 0.8%/K; at +70 °C lout rated 1.2 A
supplied active power typical	30 W
short-term overload current	
<ul> <li>at short-circuit during operation typical</li> </ul>	3.1 A
product feature	
<ul> <li>bridging of equipment</li> </ul>	Yes; Start-up with single nominal load only
number of parallel-switched equipment resources for increasing	2
the power	
Efficiency	
efficiency in percent	86 %
power loss [W]	
<ul> <li>at rated output voltage for rated value of the output</li> </ul>	4.5 W
current typical	0.75 M
during no-load operation maximum	0.75 W
Closed-loop control	0.4.W
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	0.1 %
relative control precision of the output voltage at load step of resistive load 10/90/10 % typical	3 %
setting time	
<ul> <li>load step 10 to 90% typical</li> </ul>	5 ms
load step 90 to 10% typical	5 ms
· · · · ·	0 110
Protection and monitoring	Veg. apporting to EN 60050.1
design of the overvoltage protection	Yes, according to EN 60950-1
design of the overvoltage protection • typical	1.4 A
design of the overvoltage protection • typical property of the output short-circuit proof	1.4 A Yes
design of the overvoltage protection • typical property of the output short-circuit proof design of short-circuit protection	1.4 A Yes Electronic shutdown, automatic restart
design of the overvoltage protection • typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit	1.4 A Yes
design of the overvoltage protection • typical property of the output short-circuit proof design of short-circuit protection	1.4 A Yes Electronic shutdown, automatic restart
design of the overvoltage protection • typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit	1.4 A Yes Electronic shutdown, automatic restart
design of the overvoltage protection • typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety	1.4 A Yes Electronic shutdown, automatic restart
design of the overvoltage protection         • typical         property of the output short-circuit proof         design of short-circuit protection         display version for overload and short circuit         Safety         galvanic isolation between input and output	1.4 A Yes Electronic shutdown, automatic restart -
design of the overvoltage protection         • typical         property of the output short-circuit proof         design of short-circuit protection         display version for overload and short circuit         Safety         galvanic isolation between input and output         galvanic isolation	1.4 A Yes Electronic shutdown, automatic restart - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178
design of the overvoltage protection         • typical         property of the output short-circuit proof         design of short-circuit protection         display version for overload and short circuit         Safety         galvanic isolation between input and output         galvanic isolation         operating resource protection class	1.4 A Yes Electronic shutdown, automatic restart - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178
design of the overvoltage protection         • typical         property of the output short-circuit proof         design of short-circuit protection         display version for overload and short circuit         Safety         galvanic isolation between input and output         galvanic isolation         operating resource protection class         leakage current	1.4 A Yes Electronic shutdown, automatic restart - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I
design of the overvoltage protection         • typical         property of the output short-circuit proof         design of short-circuit protection         display version for overload and short circuit         Safety         galvanic isolation between input and output         galvanic isolation         operating resource protection class         leakage current         • maximum	1.4 A         Yes         Electronic shutdown, automatic restart         -         Yes         Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178         Class I         3.5 mA
design of the overvoltage protection         • typical         property of the output short-circuit proof         design of short-circuit protection         display version for overload and short circuit         Safety         galvanic isolation between input and output         galvanic isolation         operating resource protection class         leakage current         • maximum         • typical	1.4 A Yes Electronic shutdown, automatic restart - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA
design of the overvoltage protection         • typical         property of the output short-circuit proof         design of short-circuit protection         display version for overload and short circuit         Safety         galvanic isolation between input and output         galvanic isolation         operating resource protection class         leakage current         • maximum         • typical         protection class IP	1.4 A Yes Electronic shutdown, automatic restart - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA
